The average person in the U. S. during his lifetime eats about 23 hogs, 10 lambs, eight steers and four veal calves, according to the Florida Farm Bureau.

There are approximately 20,000 known species of orchids growing in almost all parts of the world, except the polar regions.

Conventions today are big business. Florida is fortunate in having a city like Miami that can offer facilities for such large groups as the Moose, Elks, American Legion and other national organizations with such large memberships that only a few cities in the nation can care for them. It is also fortunate that this city is located so that visitors must travel most of the

state to reach it. Conventions leave a trail of dollars behind them wherever they go. Treat them with friendliness and courtesy and they will return again and again.

## VETERANS INFORMATION AND SERVICE

By Melvin T. Dixon  
State Service Officer  
Korean War Service Dependents. The widow, children and dependent parents of a deceased veteran with service since June 27, 1950, whose death was due to service, may qualify for death compensation.

The surviving widow, child or children, and dependent parents of any deceased veteran, whose death resulted from a service-connected disease or injury, incurred or aggravated in the line of duty in active service, are entitled to death compensation. The widow must have married the veteran prior to the expiration of 10 years after the end of the Korean War, a date yet to be set. No compensation is payable to the widow unless there was continuous cohabitation with person who served from date of marriage to date of death except where there was a separation which was due to misconduct of, or procured by, person who served and without fault of widow.

Parents may be paid compensation provided they are dependent upon their deceased son who died in active service or as the result of service-connected disability. Compensation paid to the parents will not reduce the compensation to widow or children. If parents are not dependent now but in later years they do not have sufficient income to be self-supporting, they may at that time apply for death compensation.

A widow loses her entitlement if she remarries. Unmarried children normally lose their entitlement upon reaching age 18, but if they are attending a school approved by the VA, they may continue to receive death compensation while attending school, but not after they are 21 or married.

Amounts payable are: Widow, no child, 75% widow; one child, 81% (each additional child 2%); one parent, 40%; two parents, each 35%.

## NEW HYDRAULIC HITCH ON DISPLAY AT HARVESTER STORES IN THE GLADES

A New Product Exhibit to introduce the new Farmall Fast-Hitch for the Farmall Super C tractor and featuring several new types of International Harvester farm equipment will be held in the Pahokee and Belle Glades stores next week, according to Ned Ayers, local International dealer.

On display will be a good number of the 77 new machines which have been developed and produced by International Harvester Company, in the last 770 days — on an average of one every 10 days. Leading the list will be the revolutionary new Fast-Hitch that couples implements to tractors instantly and automatically. It was designed by IH engineers to speed up farm work and make it easier.

"We think the new Fast-Hitch is the most important development in the farm machinery field in several years," Ned stated. "To hitch to an implement, you just back the tractor up until the two beams on the implement snap into the hitch-sockets on the tractor."

"That's all there is to it, it's really a snap! The hitch locks instantly and automatically. In just a split second you are ready to go," said Mr. Ayers. "You don't have to leave the seat to hitch or unhitch either. Unhitching is done by lifting a latch in each of the coupling beams."

Fast-Hitch is so designed that it can be made free-floating vertically or horizontally, or it can be locked in any position.

required by the implement. It can also be hydraulically tilted or leveled. All positions of the hitch are hydraulically controlled.

"Another important feature," Ned continues, "is the fact that Fast-Hitch gives the tractor driver unusually accurate control over the line of F-H implements. For example, uniform depth of the plow can be hydraulically maintained in spite of ground contour variations."

The New Product Exhibit will be in both stores and all farmers in this area are invited to attend.

Mary Claire Crider, daughter of Mr. and Mrs. W. F. Crider attended the University of Miami's sixth annual Summer Music Camp. The fifth and final concert of the season, Sunday, July 28, climaxed a number of concentrated music study for 210 students in the camp.
